SUMMARY

As a Back-End Developer, I have extensive experience in leveraging Laravel and related technologies to build and optimize web platforms. My work has focused on enhancing user engagement, streamlining operations, and developing innovative applications for various industries, including sports, real estate, and e-commerce

EXPERIENCE

Back-End Developer
THE FIRST AGENCY Company

07/2025 – **Present**

A software house delivering scalable digital solutions across multiple industries

- Enhanced code quality in Laravel projects by applying clean code standards and performing structured refactoring Built and maintained complex systems with scalable architectures and efficient service integrations Improved internal development workflows to reduce delivery time and operational mistakes Optimized application performance through query tuning, cache strategies, and API structure improvements

Back-End Developer
Sportyano Company

10/2024 – 07/2025

Sportyano Company focuses on enhancing sports engagement through technology

- Building and optimizing Laravel-based web platforms to elevate the sports experience
- Streamlining operations and engaging users with dynamic, performance-driven solutions

Back-End Developer
On Call Company

03/2024 – 10/2024

On Call Company specializes in internal process enhancements through web applications

- Building and maintaining web applications in Laravel to streamline internal processes
- Contributing to increased efficiency and productivity

CERTIFICATION

Certificate of Appreciation (Sportyano Company)
Which reflects the company's appreciation for my hard work and commitment to providing robust and reliable software solutions, improving application performance, and contributing to the launch of their project.

Software Engineering (Information Technology Institute)
Certification in Back End Development
